

25 AVATAR SCRIPTS · ~20 SECONDS EACH

The Urban Trader's Guide to Credit Spreads

HOW TO USE THESE SCRIPTS

- Each script runs **~20 seconds** at a confident podcast pace ($\approx$ 48-52 words). Read smooth, not rushed.
- **Visual cue** = the image from the book to show on-screen behind the avatar for that clip.
- Drop the spoken line into your avatar tool. The cues are for your editor / b-roll.
- Post one a day for a **25-day content series**, or stack 3-4 into a longer episode.
- Voice tip: confident, calm, "I'm giving you the cheat code" energy.

THE 25-EPISODE SERIES

- | | |
|-----------------------------------|------------------------------|
| 1. Welcome to the Collective | 14. The MSFT Profit Bracket |
| 2. The Small-Account Promise | 15. Step-by-Step Execution |
| 3. What's Inside the Book | 16. A Real SOFI Trade |
| 4. The Greeks Street Map | 17. The 2% Rule |
| 5. Delta = Your Shield | 18. Take Profit at 50% |
| 6. Theta = Your Clock | 19. Cut the Loss Early |
| 7. The Theta Hourglass | 20. Beat Your Own Brain |
| 8. You Are the House | 21. The \$500 Starter Plan |
| 9. The Big Three Tickers | 22. The \$1,000 Portfolio |
| 10. SPX — The Stable One | 23. The Growth Staircase |
| 11. SOFI — The Small-Account King | 24. The One-Page Cheat Sheet |
| 12. The Credit Spread Fortress | 25. The Journal + Your Move |
| 13. MSFT — The Steady Giant | |

EP 01 · Welcome to the Collective

~50 words · 20s

□ **ON-SCREEN:** Book cover image — the cyberpunk rooftop trader + NERDCOMMAND logo.

□ "What's good, this is Nerdcommand. Welcome to the Collective. We don't gamble out here — we engineer income. I built a full book showing you how to trade credit spreads the safe way. Real setups, real numbers, real discipline. Trying to grow a small account? You're in the right place. Let's level up."

EP 02 · The Small-Account Promise

~52 words · 20s

□ **ON-SCREEN:** "Welcome to the Collective" rooftop image.

□ "Everybody thinks you need big money to trade. That's a lie. This book is built for the beginner with five hundred bucks. I'ma show you how to stretch a small account, trade like the house, and stay in the game long enough to win. Slow, stable, consistent. That's the Nerdcommand way."

EP 03 · What's Inside the Book

~52 words · 20s

□ **ON-SCREEN:** Book table-of-contents page (pull from the guide HTML).

□ "Here's what's inside the guide. Ten chapters, broken down simple. We cover the Greeks, the three tickers I

trade, step-by-step execution, exit strategy, risk rules, and trading psychology. Plus two personal money plans — one for five hundred, one for a thousand. Read it twice, do the quizzes, and your whole game changes."

EP 04 · **The Greeks Street Map**

~52 words · 20s

□ **ON-SCREEN:** The "Greeks Street Map" graphic — neon street, Delta shield, Theta hourglass.

□ "Check this graphic right here — the Greeks street map. Trading without the Greeks is like driving blind. Delta is your shield, we keep it low. Theta is your clock, it pays you daily. I show you exactly how to read both, so price moves safe inside the lane every single time."

EP 05 · **Delta = Your Shield**

~51 words · 20s

□ **ON-SCREEN:** Zoom on the green "Delta 0.15" shield from the street-map image.

□ "Let's talk Delta. Delta is directional risk. When we sell an option, we want a Delta of point-two-oh or lower. That means the stock has about an eighty percent chance of staying out of our danger zone. Low Delta equals a thick shield. That's how we sleep good at night, trust."

EP 06 · Theta = Your Clock

~48 words · 20s

□ **ON-SCREEN:** Theta hourglass graphic, gold coins flowing out.

□ "Theta is your best friend. Every single day that passes, the option you sold loses value. That's profit in your pocket. The gambler pays you for time — you're the house now. Time always runs out, so time always pays you. That's the whole secret to this game."

EP 07 · The Theta Hourglass

~50 words · 20s

□ **ON-SCREEN:** Full Theta hourglass image, slow zoom in on the falling coins.

□ "Look at this hourglass. Gold coins dropping as the sand falls — that's Theta in real life. You sold the option, now the clock works for you, not against you. Every tick drops money into your account. We don't chase moves. We let time do the heavy lifting. That's Nerdcommand."

EP 08 · You Are the House

~50 words · 20s

□ **ON-SCREEN:** Risk-shield graphic (gold coins behind a teal energy shield).

□ "Repeat after me: I am the house, not the gambler. The gambler hopes. The house uses math. We only take high-probability setups — seventy to eighty percent

chance of winning. We don't care if the stock goes up, down, or sideways, as long as it stays out the danger zone."

EP 09 · **The Big Three Tickers**

~50 words · 20s

□ **ON-SCREEN:** Cover image or a 3-card title card reading "SPX · SOFI · MSFT".

□ "I don't chase every stock. I stick to three — SPX, SOFI, and MSFT. Knowing a few tickers deep is safer than knowing many a little. Watch the same three every day and you start feeling the moves before they happen. Focus beats chaos every time. These are my streets."

EP 10 · **SPX — The Stable One**

~48 words · 20s

□ **ON-SCREEN:** Greeks street-map "SPX Highway" lane, or book SPX section card.

□ "First ticker: SPX, the S&P 500. No single-stock risk because it holds five hundred companies — one bad apple can't sink the basket. It's the most stable environment out there. For quick income, I run short spreads. But SPX is for bigger accounts. Earn your way up to it."

EP 11 · SOFI — The Small-Account King

~48 words · 20s

□ **ON-SCREEN:** Credit-spread fortress image labeled "SOFI".

□ "Second ticker: SOFI. This is the favorite for small accounts — five hundred to two thousand bucks. High volume, predictable price floors. I run monthly Bull Put Spreads right at the six or seven dollar support. If you're starting small, SOFI is exactly where you learn the game."

EP 12 · The Credit Spread Fortress

~49 words · 20s

□ **ON-SCREEN:** Full credit-spread fortress cutaway (inner wall = sold strike, moat = bought strike).

□ "Check this fortress. The inner wall is the strike you sold. The outer moat is the strike you bought for insurance. Market volatility just bounces off the moat, while inside, your premium piles up like gold. That's a credit spread — protected on both sides. Safe and stacked."

EP 13 · MSFT — The Steady Giant

~49 words · 20s

□ **ON-SCREEN:** MSFT safety-bracket chart image.

□ "Third ticker: Microsoft. Consistent growth, high implied volatility, but it rarely makes wild moves. When

MSFT runs up too fast and gets overbought, I sell Bear Call spreads on the weekly. Patience here is a position — if it's not overbought, I just skip the week."

EP 14 · The MSFT Profit Bracket

~48 words · 20s

□ **ON-SCREEN:** MSFT bracket chart zoom — "Profit Zone" + "Statistical Edge: 82%".

□ "Look at this chart. Two glass brackets clamp the price line. Everything inside that blue zone is your profit zone. As long as MSFT stays in the bracket, you win. Floating right there: statistical edge, eighty-two percent. That's not luck — that's math doing the work for you."

EP 15 · Step-by-Step Execution

~49 words · 20s

□ **ON-SCREEN:** Greeks street-map with "green light" glow, or book step-cards.

□ "Now the moves. Step one: find the floor. Make sure the stock's above its fifty-day average — that's your green light. Step two: check the Greeks — Delta around point-one-five, Theta positive. Step three: open the spread. Follow these like a recipe and don't skip a single step."

EP 16 · A Real SOFI Trade

~50 words · 20s

□ **ON-SCREEN:** Credit-spread fortress + on-screen numbers (\$8 / Sell \$7 / Buy \$6.50 / Credit \$20).

□ "Real example. SOFI's at eight dollars. You sell the seven put, collect about forty bucks. You buy the six-fifty put for insurance, pay twenty. Net credit, twenty dollars. If SOFI stays above seven, you keep all twenty. Forty percent return on your risk. That's how the math pays."

EP 17 · The 2% Rule

~49 words · 20s

□ **ON-SCREEN:** Risk-shield graphic with "2%" badge overlay.

□ "Nerdcommand rule number one: never risk more than two percent on a single trade. Five-hundred-dollar account? Your max risk is ten bucks. That's how you survive a bad streak to reach the good one. One trade can never take you out. Protect the capital at all times."

EP 18 · Take Profit at 50%

~49 words · 20s

□ **ON-SCREEN:** Exit-strategy image — green "Take Profit 50%" sign.

□ "Knowing when to leave is just as important as knowing when to enter. Here's the rule: take profit at fifty percent. You collected twenty? Buy it back at ten,

keep the rest, walk away. The last bit crawls and adds risk. Take the sure win and redeploy the money."

EP 19 · **Cut the Loss Early**

~51 words · 20s

□ **ON-SCREEN:** Exit-strategy image — amber "Cut Loss" sign.

□ "And here's the hard rule: cut your loss at two times your credit. Collected twenty? Close it when you're down forty. Don't hope. Don't wait for it to come back. Hoping is how small accounts die. The math doesn't care about your feelings. Hit the line, close the trade."

EP 20 · **Beat Your Own Brain**

~50 words · 20s

□ **ON-SCREEN:** Risk-shield or welcome image; overlay text "FOMO · REVENGE · GREED · HOPE".

□ "Your biggest opponent isn't the market — it's your own brain. FOMO makes you chase. Revenge makes you force trades. Overconfidence makes you size up. Hope makes you hold losers. Beat all four with one thing: a written plan you follow like a robot. System two over system one."

EP 21 · **The \$500 Starter Plan**

~50 words · 20s

□ **ON-SCREEN:** Growth-staircase image, lowest step "\$500" highlighted.

□ "Here's your plan for five hundred bucks. Step one: open a broker with paper trading and practice two weeks first. Step two: deposit, keep three-fifty in cash. Step three: one SOFI trade a week, ten-dollar max risk. Two losses in a row, stop for a week. Slow wins."

EP 22 · The \$1,000 Portfolio

~51 words · 20s

□ **ON-SCREEN:** Growth-staircase image, "\$1,000" step highlighted.

□ "Now the thousand-dollar portfolio. Split it: six hundred cash reserve, two-fifty for the SOFI engine, one-fifty for the MSFT engine. Max risk, twenty bucks a trade. Target four to six percent a month on your working money, reinvest everything. Watch compounding turn a small account into a real one."

EP 23 · The Growth Staircase

~49 words · 20s

□ **ON-SCREEN:** Full growth-staircase image climbing \$500 → \$5,000.

□ "Look at this staircase. Five hundred, a thousand, twenty-five hundred, five thousand — each step is a level up. Don't skip steps. You grow a small account slow on purpose, because slow is safe, and safe keeps

you in the game. In the game, compounding does the rest."

EP 24 · The One-Page Cheat Sheet

~50 words · 20s

□ **ON-SCREEN:** The full cheat-sheet PDF displayed on screen.

□ "I also made you a one-page cheat sheet. Every rule on one page — the three tickers, the Delta target, the exit rules, the risk caps, both money plans. Print it. Tape it next to your screen. Before you open any trade, your eyes hit that sheet first. Facts only."

EP 25 · The Journal + Your Move

~50 words · 20s

□ **ON-SCREEN:** Trading-journal PDF pages, then cut to cover image.

□ "Last piece: the trading journal. Log every trade — entry, exit, profit, lesson. The journal never lies. Win rate, growth, mistakes — it's all there. So get the book, print the cheat sheet, grab the journal, and start paper trading today. Welcome to the Collective. We engineer income."
